

GREEN APPLE DAY OF SERVICE

What is it?

Green Apple Day of Service is a unique moment to join schools across the world to celebrate the central role that schools play in preparing the next generation of leaders in sustainability. A school's event is an opportunity to give students hands-on experience with sustainability, strengthening civic leadership, environmental literacy, and project management skills. Since it began in 2012, the Day of Service has inspired almost a million people in over 70 countries to act in support of sustainability at their schools.

How does it work?

Green Apple Day of Service is your day of action on a specific day that you choose during the school year. Starting on September 1, schools register their project on greenapple.org and name their date. Day of Service projects commit to making measurable change on one or more of the three pillars of a green school: environmental impact, health and wellness, and environmental and sustainability literacy. Projects make this impact at a school in a way that directly and positively affects the students.

What's in it for our school?

Green Apple Day of Service provides direct value to teachers and schools that sign up to participate. Participants will receive tailored guidance for their specific project date and project type, and they'll be rewarded with prizes for keeping up with planning and executing the project. Green Apple Day of Service is also using the DonorsChoose.org platform to catalyze donations to schools, promoting local projects through our volunteer network and providing thousands of dollars in match funding to projects that receive donations from their communities.
